

Category III CPT^{®1} Codes for FFR_{CT}

- ▶ The American Medical Association (AMA) recently issued a set of new Category III Current Procedural Terminology (CPT) codes for FFR_{CT}. With the new CPT codes, hospitals and clinics utilizing HeartFlow[®] FFR_{CT} will now be able to generate claims with both Medicare and commercial payers when FFR_{CT} is ordered for patients with suspected CAD.

The new FFR_{CT} CPT codes will become effective on January 1, 2018.

FFR_{CT} CPT Codes

CPT CODE	DESCRIPTION
0501T	Noninvasive estimated coronary fractional flow reserve (FFR) derived from coronary computed tomography angiography data using computation fluid dynamics physiologic simulation software analysis of functional data to assess the severity of coronary artery disease; data preparation and transmission, analysis of fluid dynamics and simulated maximal coronary hyperemia, generation of estimated FFR model, with anatomical data review in comparison with estimated FFR model to reconcile discordant data, interpretation and report
0502T	Data preparation and transmission
0503T	Analysis of fluid dynamics and simulated maximal coronary hyperemia, and generation of estimated FFR model
0504T	Anatomical data review in comparison with estimated FFR model to reconcile discordant data, interpretation and report
